

Module 6 Rationale

I chose a more simplistic design for my site. The colors are kind of plain because I feel like sometimes too much color can get overwhelming. I chose a slightly off white background because I personally like reading darker text on a lighter background rather than light text on a dark background.

I might change my design a bit and add a background to add a little more color to it, but I haven't decided yet. My text is pretty simple in its color scheme. Like I said I have a light background, I'm including black text, a taupe colored text, and a lighter green text. I feel that all of those colors look nice and I can still keep a more professional and sleek look.

I got the design for the My Work page from Kelsey Beachum's portfolio I saw on the PW alumni page. I like how she organized and displayed it in a way that was easily navigable. I chose a picture of my puppy and I for my landing page to show the kind of person I am to the audience when they first visit my site because I think that's important.
